

RUTUJ GANGAWANE

Data Analyst | Cloud & DevOps | Machine Learning

Pimpri-Chinchwad, Pune, Maharashtra, India | [linkedin.com/in/rutuj-gangawane](https://www.linkedin.com/in/rutuj-gangawane) | github.com/RutujC-137 | rutujc-137.github.io/Portfolio-website

PROFESSIONAL SUMMARY

Data Analyst and Cloud enthusiast with a PG-DBDA (Big Data Analytics) from C-DAC and a B.E. in Computer Engineering. Experienced across the full data lifecycle, from collection and processing to visualization and predictive modeling. Skilled in AWS cloud services (EC2, Elastic Beanstalk, SNS), CI/CD pipeline implementation, and machine learning model development. Adept at translating complex datasets into actionable business insights using Python, Tableau, and Spark.

TECHNICAL SKILLS

Cloud & DevOps: AWS EC2, Elastic Beanstalk, SNS, CodePipeline, CodeBuild, S3, IAM, Auto Scaling, CI/CD, Nginx, PM2, Git, GitHub, Linux

Languages: Python, R, Java (OOP), SQL, JavaScript, HTML/CSS

Data & ML: Pandas, NumPy, Scikit-learn, XGBoost, SVM, Logistic Regression, PySpark, Apache Spark

Deep Learning: PyTorch, CNN, Emotion Recognition

Visualization: Tableau, Power BI, Streamlit, Matplotlib, Seaborn

Databases: MySQL, MongoDB

Web Frameworks: React.js, Next.js

PROFESSIONAL EXPERIENCE

Data Analytics Intern — IFAS Pvt. Ltd., Pune, Maharashtra

January 2026 – April 2026

- Architected end-to-end CI/CD pipelines (GitHub → CodePipeline → CodeBuild → CodeDeploy → EC2 → PM2) for a 3-tier application (React frontend, React admin, Node.js backend), eliminating manual deployments.
- Provisioned Ubuntu EC2 instances with Node.js LTS v18, PM2, Nginx, and CodeDeploy agent across structured application directories.
- Configured Nginx reverse proxy routing to serve clean URLs to users without exposing raw ports.
- Implemented multi-environment architecture (Dev / QA / PreProd / Prod) with isolated pipelines and a Git branching strategy.
- Managed process reliability with PM2 ecosystem files, enabling auto-startup on reboot and zero-downtime restarts.
- Enforced production security: HTTPS via Let's Encrypt, UFW firewall rules, disabled root login, and closed unused ports.
- Authored per-app buildspec.yml and appspec.yml configs, reducing CodeBuild install time using npm optimization flags.
- Diagnosed and resolved deployment issues including Node version incompatibility and dependency corruption on EC2.

Software Developer Intern – Front End — Candent Technologies Pvt. Ltd., Pune, Maharashtra

January 2024 – April 2024

- Developed responsive, user-facing web applications using React.js and Next.js, improving page load performance through optimized component rendering.
- Integrated MongoDB as the backend data store, designing schemas and building RESTful API endpoints for dynamic content delivery.
- Contributed to team sprint cycles, performing code reviews and resolving UI/UX bugs to maintain quality standards.
- Built reusable component libraries that accelerated feature development across multiple internal projects.

PROJECTS

Lung Cancer Prediction using Predictive Modeling & Analysis

Python, PySpark, MySQL, XGBoost, SVM, Logistic Regression, Streamlit, Tableau

https://github.com/RutujC-137/Lung_Cancer_Prediction

- Built a scalable lung cancer prediction pipeline using Apache Spark for large-scale patient data processing, with real-time predictions via Streamlit and interactive dashboards via Tableau.

AI Trip Planner

LangGraph, FastAPI, Streamlit, Groq / OpenAI LLMs

https://github.com/RutujC-137/AI_Trip_Planner

- Built an agentic AI travel planning application using a ReAct agent that calls weather, place search, expense calculator, and currency converter tools to generate complete trip plans.

WeatherSphere AI (Interactive 3D Weather Explorer)

React, TypeScript, Three.js, Open-Meteo API, Ollama

<https://github.com/RutujC-137/terracast-ai-bot>

- Built an interactive 3D Earth globe with live weather data, an AI assistant, animated weather icons, and real-time ISS tracking.

Novel Ensembled Approach to Genomic Data (B.E. Final Year Project)

Machine Learning, Ensemble Methods, Python

<https://github.com/RutujC-137/Novel-Ensembled-Approach-to-Genomic-Data-B.E-Project->

- Developed a novel ensemble ML model for early-stage Diabetes Mellitus prediction using genomic data, combining multiple classifiers to improve diagnostic accuracy.

Facial Recognition using CNN (Emotion Detection)

PyTorch, Deep Learning, CNN, CK+48 Dataset

<https://github.com/RutujC-137/Facial-Recognition>

- Implemented an emotion classification system using a custom PyTorch CNN with a full preprocessing pipeline and classification report evaluation.

EDUCATION

PG-DBDA (Post Graduate Diploma in Big Data Analytics) — C-DAC ACTS, Pune

February 2025 – August 2025

Score: 198/320

B.E. in Computer Engineering — MES College of Engineering, Savitribai Phule Pune University

Completed 2024

70.3% – First Division

XII – Science — Modern College of Arts, Science & Commerce, Maharashtra State Board

Completed 2020

65.23%

X — Alphonso High School, Maharashtra State Board

Completed 2018

81.4% – First Division

CERTIFICATIONS & ACHIEVEMENTS

- Kaggle – Intro to Machine Learning (Certified)
- 1st Place – Integral Ad Science Codefest 2022 (Certificate of Achievement)
- 3rd Position – Robo Race (Line Following Robotics Workshop), organized by Roboclub MESCOE

LANGUAGES

Marathi, Hindi, English
